Locality A

mouth of Shepard Canyon - Only mine -
crystal & me mine, situated in adjacent canyons.

Very steep canyons with practically no dry washes.

no sand bottoms whatever. Springs marked on
Topographic sheets all dry. Brush sparse and
no earth. Practically all rocks.

no snakes of any description seen. Lizards

none

— — — — —
Panamint Valley in Vicinity of Ballarat poor collecting,
not sufficient dry washes and sandy areas.

Floor of Valley too rocky and alkali dry lake
makes a barrier between mountains and Floor of Valley

Loc. # B. Pleasant Canyon - Deep Rocky Gorge High walls
just above alluvial fan. Water about 2 miles up
Canyon. Narrow Canyon bottom with brush not particularly
dense, except in water course where there are mesquite
willow & salt brush. Lizards not abundant although it appears
first class country. No snakes seen. On going up
Canyon to the stars. First met with. *Cnemidophorus* begins
about same elevation. *Crotaphytus c. baileyi* begins about
3500 ft. *Sceloporus* about 4000 ft. No species found
abundantly.

Suprise Canyon - Steep rocky Canyon with narrow walls
in places, mesquite and Sage & Willows in lower
parts. At Panamint City near head of Canyon. Chinon Pine and
Juniper trees quite numerous. Ceanothus, utas, and c. c. baleyii
up to 4,500 ft. Sedapomus from 5,000 up. utas fairly
common but by no means abundant, one Rattlesnake
seen, one Tantilla #660 caught at 4,500 foot elevation
crossing the road about 5.30 P.M. (Shaded section of
road) One Shrub about same elevation taken
under a small stone by the roadside -
much more water in Suprise Canyon than any
of those visited so far.

Angus cuts. Forest south of Grand Canyon has Oreads
on line at the head. Deep rocky gorge with road following
Canyon bottom. An abandoned road near Oreads creek collected
one *Trimerophora* crossing lake in the stream. Saw and collected
one *Scoloporus subagilis* at 4,112 feet.

On road to Tama from slate hills collected 3 *Dipodomys*.
not very common, only 1 seen.

May 6 *Phrynosoma platyrhina* caught in surprise trap
on top of ridge at 4,500 feet.

May 7 Took one *Pituophis* crossing road about
8 am on lower foothills of Angus cuts.

Homewood Canyon, arroyos near wide bottom covered with
brush. Spring of good water at upper end. Took metamorphoses
little after dark on rocky hillside just above wash.
One *Hypsiglena* taken at night while
checking rounds of mouse traps. *Lepus* are particularly
abundant, in fact could be called scarce. One
Sabotus taken on floor of Canyon about 8 a.m.
Found in large rock piles.

Snow Canyon arroyo alt. 4500 ft. 13. Large *Hony*
wash with *Agropyron* quite scarce.
